*non-residential care (Ce.D.A.F. –
Community **C**Entre **D**ay-time for **E**lders **F**rail)*
- **Institutes of rehabilitation**
for people with mental illness

Sanimedica

Residential Care for Alzheimer's

- Assisted living arrangements in large apartment or hotel-like buildings or can be set up as a "board and care" home for a small number of people. They offer different levels of care, but often include meals, recreation, security, and help with bathing, dressing, medication, and housekeeping.
- Skilled nursing facilities -- or nursing homes -- provide 24 - hour services and supervision. They provide medical care and rehabilitation for residents who are mostly very frail or suffer from the later stages of dementia.

Social services and counseling on health-related issues (mental disorders)

works with S.S.N., communities, and mental health consumers and their families to provide people with mental illness with treatment and assistance in meeting basic needs (housing, jobs, education, social services, transportation, medical and nursing care), to bridge the "knowledge" gap between identifying effective approaches to the delivery of mental health services and the "application" gap of putting those approaches into action in local communities

Evergreen
COOPERATIVA SOCIALE

- **Services for newborns, childhood and young people**
(crèche, nursery school, scholastic assistance for mental disorders and disability)
- **Home care for child in assisted ventilation**
